## **A/C Button Delete Installation Instructions**

Disconnect the yellow connector from the back of your factory A/C button. Then push the button from behind to pop it out of the front:

Push the delete in keeping in mind it only fits one way. The cut out/stepped section on the rear should face the blower knob, as shown here:

The delete has a tighter fit than the original A/C button did, this is intentional. You will need to push it firmly until it seats:
