B20a/B21a Coil Pack Hold Down Plate Installation Instructions

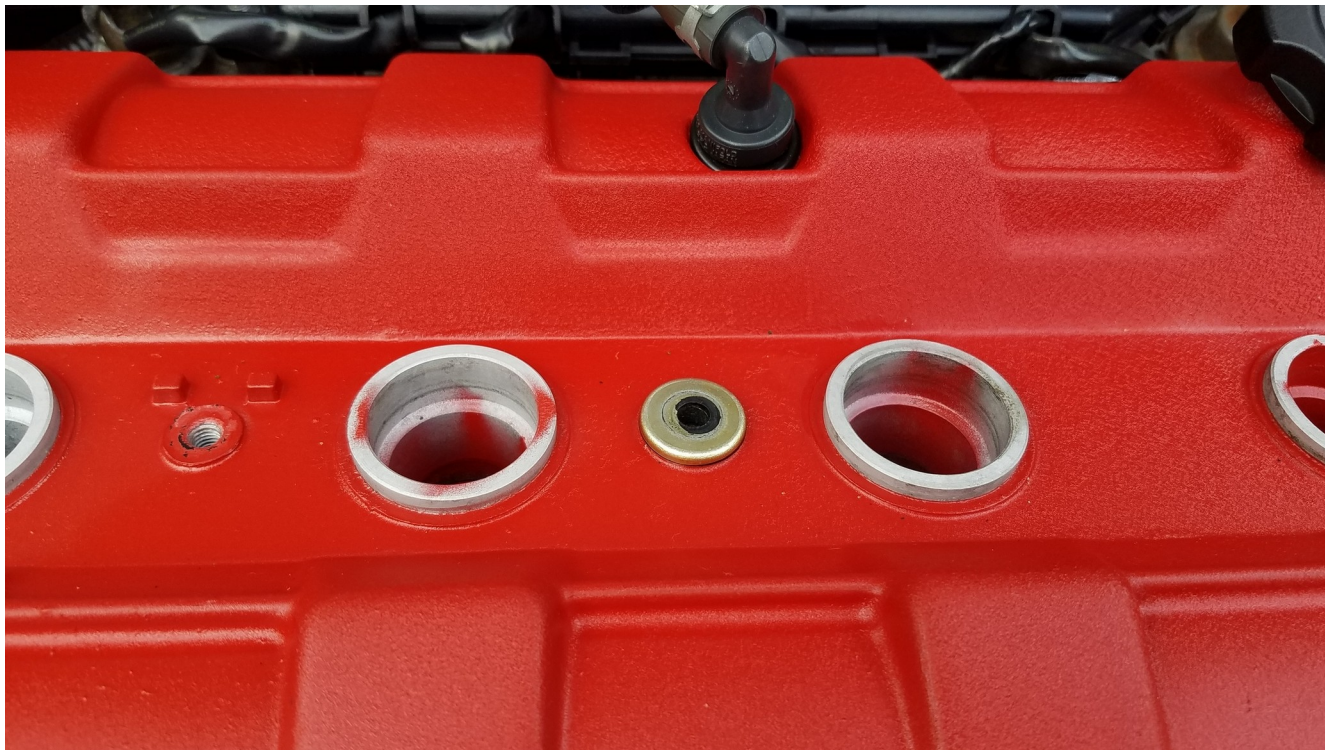

This coil pack hold down plate is intended to be used with coil packs from Honda J-series V6 engines.

Honda coil pack part number: 30520-RCA-S01

NGK coil pack part number: NGK 48841

To drive the coil packs you need an ECU and wiring setup which supports coil packs.

Start by removing the plug wires and plug wire brackets from the valve cover, leave the center sealing washer:

Place the supplied o-rings around the spark plug tubes. These stop water ingress from below the plate:

Install the coil pack hold down plate using one of the supplied bolts. Torque to factory spec:

Final step is to install your J-Series coils using the remaining bolts:
